

# Koraflex Plus

Malleable, durable lead-replacement flashing solution. Available in colours to match lead or to complement roof tile colours.

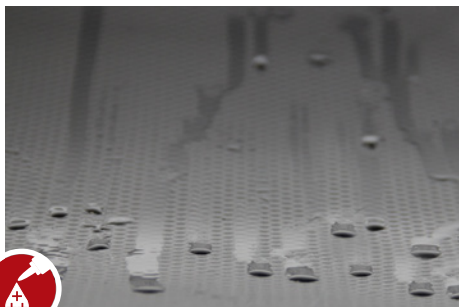

Durable and fully weather-resistant outer layer

Extremely flexible expanded aluminium mesh inner

Polysobutylene (PB) inner layer

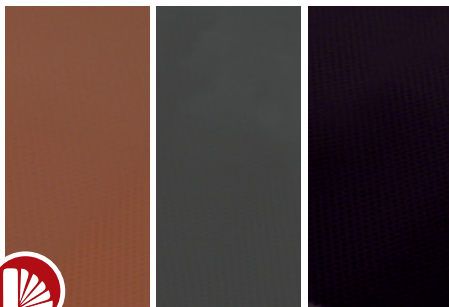

Complete butyl adhesive backing

Backing film, split for easier application

**Complete butyl adhesive backing:**

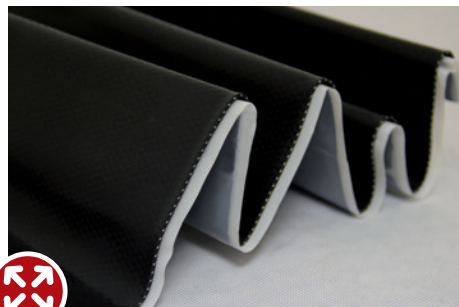

Proven in long-term use, the butyl adhesive makes Koraflex Plus an extremely durable flashing solution, fully resistant to all weathers and seasonal temperature variations.

**Red**

**Grey**

**Black**

**Flexibility and stretch:**

Koraflex Plus has up to 70% stretch in length and 15% stretch in width, making it easily as malleable as lead and able to form to complex shapes such as corners and deep tile profiles.

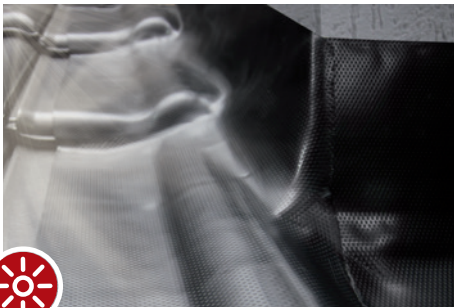

## Installer-friendly

Koraflex Plus is a universal lead-replacement flashing solution that can be installed faster and easier than lead. The composite material ensures a highly stable and malleable product that can be easily formed to any complex shape and profile. The complete butyl backing ensures durable and reliable adhesion to most building materials including clay, concrete and metal surfaces.

## Eco-friendly

Koraflex Plus is completely lead and solvent-free with no chemical leeching, making it an environmentally safe solution for any roof, including water-harvesting systems.

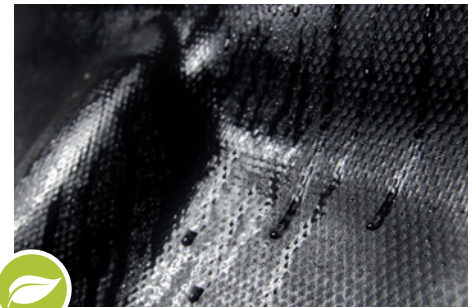

### UV- & Temperature resistance:

Koraflex-Plus is extremely resistant to long term UV and temperature variation. Highly colour stable and resistant to temperatures ranging from -40°C to +90°C.

### Easy installation & handling:

Koraflex Plus does not require any prefabrication or welding. With its complete butyl backing, no extra adhesive or mastic is required. Cutting and shaping is easy, cutting down on installation time.

### Environmentally safe:

The smooth, durable surface repels dirt and lichens, making it a safe product to use with rainwater harvesting systems.

**Koraflex Plus flexible covering can be used for covering:**

- exterior walls
- dormers
- chimneys
- skylights
- valleys
- solar gutters & roof windows

**Surface colours:** Red / Grey / Black

**Length of roll:** 5 m

**Width of roll:** 300 mm / 450 mm

**Weight of roll:** 6,65 kg

**Packaging Unit:** 2 rolls / box

## Key Benefits of Koraflex Plus

- Part of our 15 year RoofSpec guarantee
- Works exactly like lead with the advantage of an adhesive backing
- Easy to use and faster to fit: no prefabrication or welding required
- Improved resistance: long lasting, water tight and leak proof flashing
- Improved workability: no extra adhesive, mortar or mastic needed
- Greener for the environment: lead and solvent free flashing solution
- BBA approved
- Comes in three different colours. Blends in to prevent theft
- Does not require the use of pattenation oil, avoiding unsightly roof staining
- Improved colour stability
- Much more cost-effective option than Lead
